ProjectPro Application and Licensing – ProjectPro License Activation

INTRODUCTION

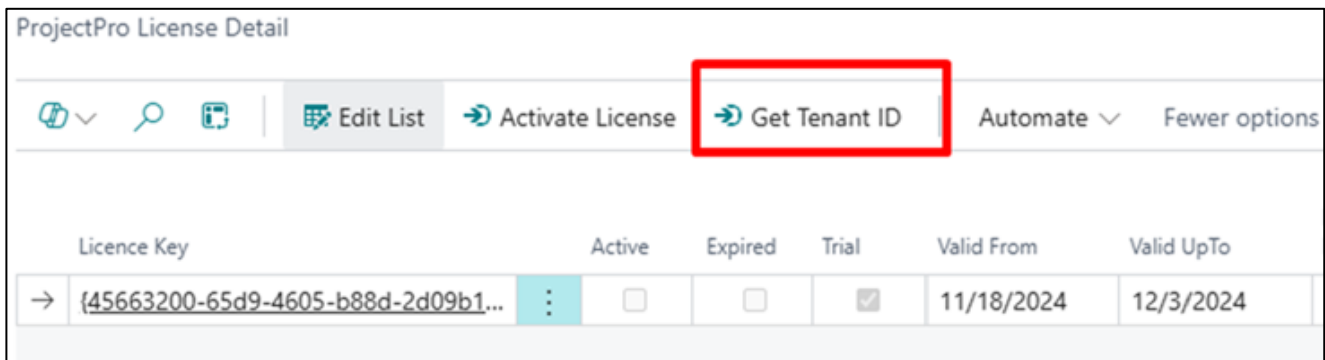

The process for activating the ProjectPro License is the same in all cases. This includes creating a new environment, copying Production environment to Sandbox and vice versa.

PROJECTPRO LICENSE DETAIL

When a ProjectPro application/extension is installed/downloaded from the Microsoft AppSource, it is updated as the “Trial” version by default with 15 days of validity.

To map this with the purchased license you must open the ProjectPro License Detail page.

Click on the “Get Tenant ID” which will auto-send an email to the ProjectPro Licensing department that maps your data with the purchased license.

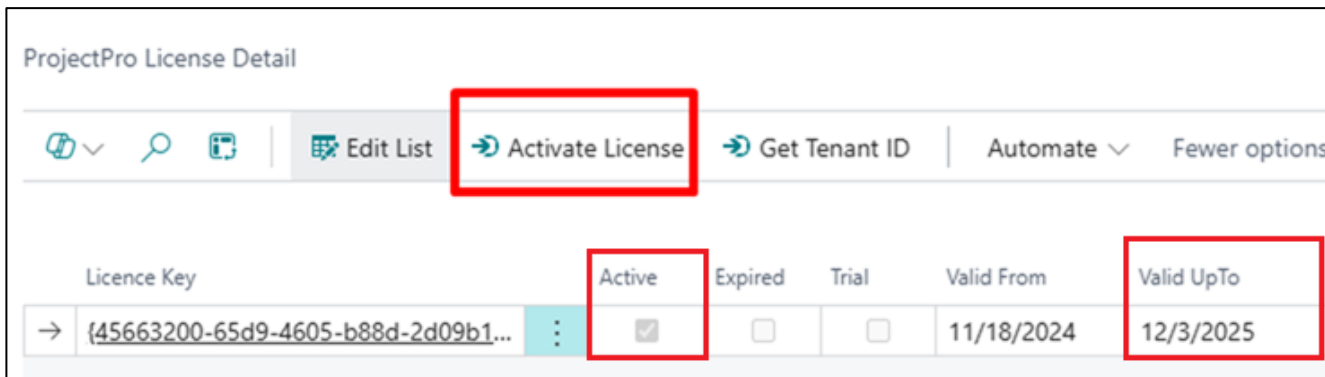

ProjectPro License Detail

→ Edit List → Activate License → **Get Tenant ID** Automate Fewer options

Licence Key	Active	Expired	Trial	Valid From	Valid UpTo
→ {45663200-65d9-4605-b88d-2d09b1...}	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	11/18/2024	12/3/2024

Next, you must click on “Activate License” from the same page. This will update your license details with your actual valid dates and update the version as “Active” from “Trial”.
